Experience/Goals:

I've worked in a Freelancer project where I helped with few things, especially in the Front End, and now I am looking for an opportunity in the Systems Development area to apply and deepen my technical knowledge. I also have some applications made by myself and others made on Rocket Seat's Ignite course, both of them, using: ReactJS + TypeScript, NodeJS + Typescript, Docker and Postgres. Check it out on <https://github.com/luizfelipebraga>.
Talk about me, I had my first contact with programming I was 16 in an Analysis Course at Senai. I already use some agile methodologies like Scrum and KANBAN.

Projects:

Supply Delivery - 2021: Sales management system. Still in progress.

Senai Vagas - 2020: Senai student hiring website. [Repository](#)

Education/Certificates:

2021/2025

College Impacta Tecnologia – São Paulo/SP, Brazil

Course: Computer Science

2019/2020

SENAI – São Paulo/SP, Brazil

Course: Analysis systems development

2018/2020

Tobias de Aguiar – São Paulo/SP, Brazil

High School

Technical Skills:

(1+ years): ReactJs, TypeScript, Html, CSS, JavaScript, C#, MySql, Postgres and Docker.

(Studying): ReactJs, NodeJs, Elixir, AWS, Java, Spring Boot, Firebase, MongoDB.
